

Content Rights and Safety Statement

PLUGGD iOS 1.0.0 (Build 5) | App Store Connect ID 6765738727 | Prepared 14 August 2026

Creator uploads

PLUGGD operates a music-discovery and creator-community service. Creators who upload music, artwork, video or other material warrant that they own or control the rights required to publish and monetize it on PLUGGD. The Terms prohibit unauthorized uploads and allow removal, suspension and account action.

Review media and catalogue boundaries

The audio and artwork used in Build 5 review flows and App Store screenshots is controlled by PLUGGD or supplied by creators who authorized its use. Imported third-party catalogue records are metadata only: they receive no playable URL, cannot enter the native player or queue, and are not sold as PLUGGD audio.

Notting Hill Carnival editorial

The Carnival hub is an independent editorial guide. Photographs, stories and sources are recorded in PLUGGD's content-rights register. The app distinguishes PLUGGD editorial from official operational guidance and links to official travel, accessibility and safety sources. It does not claim official-event status, live crowd density or invented operational signals.

User-generated content and takedown

PLUGGD provides in-product reporting, blocking and filtering for user-generated content, plus a published takedown process. Rights holders, users and Apple may contact support@pluggd.fm for rights, safety or moderation matters.
